

Telephone Systems

Dolphin Computer Upgrades Ltd can provide a range of PBX Telephone Systems to suit all requirements. Whatever your size of business, whatever features you need we can provide a Telephone system that will suit.

Current Recommendations:

The Panasonic KX-TEA308 Telephone system is configured for 3 analogue lines and 8 extensions. This is the capacity of this system, so if you feel 3 incoming lines and 8 extensions will not be enough to see you through your expansion or plans in future years, then you can opt for the next system up, which is the Panasonic KX-TES824.

The Panasonic KX-TES824 is configured as standard for 3 analogue lines and 8 extensions, but can be expanded up to 8 lines and 24 extensions. In concept it is the same system as the entry level system, but incorporates more expansion flexibility.

Key Features:

- ✓ Call hold and pick-up
- ✓ Call transfer
- ✓ Call waiting
- ✓ Conference call
- ✓ DISA
- ✓ Intercom
- ✓ Distinctive ringing
- ✓ Do not disturb
- ✓ Door phone intercom
- ✓ Extension CLI (requires a card)
- ✓ Flexible ringing assignment
- ✓ Hold reminder
- ✓ Last number redial
- ✓ Music on hold (internal or external)
- ✓ Programmable call restriction
- ✓ System speed dialling (80 numbers)
- ✓ Automatic fax transfer
- ✓ Call forwarding
- ✓ Fax detect - routes faxes direct to an extension with a fax machine

Panasonic[®]

The system has programming functions and call features which can be programmed in at your request. It has an auto answer system, that can then be programmed to dial certain extensions etc... Expansion Cards may be required depending on your needs, and these cards can be purchased at a later time if required.

All equipment holds a one year manufacturers guarantee. After the initial installation, any further reprogramming, would be chargeable at our hourly rates, as well as further installation of expansion cards and users in the future.
